2026 MAA Summer Meeting

- ▶ Pledge of Allegiance

MAA Antitrust Statement

- ▶ The Michigan Aggregates Association assigns the highest priority to full compliance with both the letter and the spirit of the antitrust laws, and it is vital that this meeting be conducted in a manner consistent with that policy. If at any time during the course of the meeting, the staff or officers believe that a sensitive topic under the antitrust laws is being discussed, or is about to be discussed, they will so advise the meeting and halt further discussion. As attendees at this meeting, you should likewise not hesitate to voice any concerns you may have in this regard.
- ▶ It is important to bear in mind that those in attendance at this meeting may be your competitors. Any discussions of commercial matters with one's competitors may create the appearance of an antitrust violation, even though there is none. Therefore, such discussions should be avoided at all times before, during, and after this meeting.

▶ Adopted by the MAA Board of Directors March 22, 1995

2026 Summer Conference

Friday July 17, 2026

James Bay Hall

Northwest Territories

7:30 a.m. - 8:30 a.m. Membership Breakfast

► Isaiah 117 House

- When children are removed from their homes out of concern for their safety, they are usually brought to a child welfare services office to await placement. This wait can be a few hours to several days. These children often have nothing with them and are scared, lonely, hungry, and in dirty clothing.
- Isaiah 117 provides a comforting home where these children instead can be brought to wait - a place that is safe with friendly and loving volunteers who provide clean clothes, smiles, toys, and snuggly blankets. This space allows children to receive the comfort and care they need while child welfare staff can do the necessary paperwork and identify a good placement.

Our Purpose

Isaiah 117
changing the way foster care begins

MAA History in the Making

PROCEEDINGS OF THE BOARD OF DIRECTORS AND MEMBERS OF THE MICHIGAN SAND AND GRAVEL PRODUCERS ASSOCIATION DINES RESTAURANT, LANSING, MICHIGAN NOVEMBER 6, 1964

The meeting was called to order by Charles Gooding, Vice-President. Those in attendance were:

Sky Cheney
Carl Kirchgessner
Carl Fiebig
Paul Hubscher
Ammon Schreier
Charles Gooding
Norman Fredericks
Richard Blackford
William Cheney
Max Miller

John Salswadel
Gerald Underwood
August Stoeffler
Lyle Walker
Donald Walker
E. V. McClure
Ted Zeef
Jerry Croope
Lloyd Reid

Guests: Robert Lockow - Portland Cement Association
William Krell - Portland Cement Association

Mr. Norman Fredericks, representing Koenig Coal and Supply Company of Detroit was welcomed as a new member.

Mr. Charles Gooding, Vice-President, made the following committee changes:

1. Transportation and Legislative to Transportation.
2. Taxation to Taxation and Legislation.
3. Created a committee of "Asphalt Paving".
4. Made membership assignments to the various committees as shown on the enclosed sheet.

The members present, acting as a committee of the whole, reviewed activities for the consideration of the association committees.

COMMITTEE ON TRANSPORTATION

This committee was originally formed in the hope that the truck rates as established by the Public Service Commission for hauling gravel could be either eliminated or considered to be a maximum rate since they are unenforceable and unenforced. In the discussion that followed, two members cited cases where the rates were being checked by the P.S.C.

Questions arising from the discussion:

1. How is the route determined?
2. How is it measured?
3. Mickelson Sand and Gravel Company have a court case involving a truck leasing arrangement. Several members expressed a desire to be informed on the outcome of this case.

MAA History in the Making

- ▶ Information gathering phase to create document about the history of the Michigan Aggregates Association.
- ▶ Please share any stories, milestones or historical references.

The HISTORY OF
MICHIGAN AGGREGATES ASSOCIATION

OUR ROOTS
WHERE IT BEGAN

Founded in 1960, MAA has a strong history built by industry leaders.

We are looking for:

- Historic mining photos
- Early equipment and operations
- Founding companies and leaders
- Old meeting or office photos

Help Us Preserve Our Legacy.

MOMENTS THAT MATTER
DEFINING OUR INDUSTRY

Help us capture the key moments that shaped our industry.

We are looking for:

- Legislative milestones
- Industry events and conferences
- Safety and environmental progress
- Committee work and partnerships

Your Story Matters.

FROM PIT TO COMMUNITY
THE FULL STORY

Our industry builds more than materials. We create spaces that serve communities for generations.

We are looking for:

- Before and after photos
- Reclaimed land uses
- Community partnerships
- Environmental improvements

Help Us Show The Transformation.

TOP 10 AI TOOLS

FOR WORKPLACE PRODUCTIVITY

The tools that separate the "I'll do it manually" crowd from the people who actually leave the office on time.

01

Claude

by Anthropic

"Your AI thinking partner"

WHAT IT DOES

A conversational AI assistant designed for deep reasoning, writing, coding, analysis, and complex problem-solving.

HOW TO USE IT AT WORK

- ▶ Draft emails, reports, and documents in seconds
- ▶ Analyze data, summarize research, and research topics
- ▶ Debug code and explain technical concepts
- ▶ Brainstorm ideas and think through complex decisions

01

02

Microsoft Copilot

for Microsoft 365

"AI inside every app you already use"

WHAT IT DOES

Embedded AI across Word, Excel, PowerPoint, Outlook, and Teams — turning hours of work into minutes.

HOW TO USE IT AT WORK

- ▶ Summarize meetings and draft follow-up emails in Teams
- ▶ Generate PowerPoint decks from a simple text prompt
- ▶ Build Excel formulas and analyze data without expertise
- ▶ Rewrite and polish documents in Word instantly

02

03

NotebookLM

by Google

"Your AI research companion that understands your materials"

WHAT IT DOES

Upload documents, notes, or research materials and ask AI questions about them to unlock insights.

HOW TO USE IT AT WORK

- ▶ Upload PDFs or research documents and ask AI to summarize key points
- ▶ Create audio notebooks that let you study and review materials hands-free
- ▶ Ask follow-up questions to go deeper into your research materials
- ▶ Compare multiple sources and synthesize information into coherent insights

03

04

Grammarly

AI Writing Assistant

"Write like you mean it"

WHAT IT DOES

AI-powered writing tool that catches grammar issues, suggests tone improvements, and rewrites for clarity — everywhere you type.

HOW TO USE IT AT WORK

- ▶ Fix grammar, spelling, and punctuation automatically
- ▶ Adjust tone (formal, confident, friendly) with one click
- ▶ Rewrite sentences for clarity and conciseness
- ▶ Works in email, Docs, Slack, and your browser

04

05

Notion AI

AI-powered Workspace

"Your second brain, smarter"

WHAT IT DOES

Notion's AI layer that summarizes notes, generates content, answers questions about your docs, and helps you think.

HOW TO USE IT AT WORK

- ▶ Ask questions about your entire workspace instantly
- ▶ Auto-summarize long meeting notes and documents
- ▶ Generate project plans, SOPs, and outlines from prompts
- ▶ Fill in action items and next steps automatically

05

06

Otter.ai

AI Meeting Assistant

"Never take notes again"

WHAT IT DOES

Real-time meeting transcription and AI summaries that capture everything said and surface key action items automatically.

HOW TO USE IT AT WORK

- ▶ Transcribe Zoom, Teams, and Google Meet automatically
- ▶ Generate meeting summaries and action items instantly
- ▶ Search across all past meetings with keywords
- ▶ Share meeting notes with teammates in one click

06

07

Perplexity AI

AI Research Engine

"Google, but it actually answers you"

WHAT IT DOES

A conversational search engine that finds, reads, and synthesizes information from across the web with cited sources.

HOW TO USE IT AT WORK

- ▶ Research topics and get cited, sourced summaries
- ▶ Dig into competitive intelligence and market trends
- ▶ Get current news and events with source attribution
- ▶ Ask follow-up questions to drill deeper naturally

07

08

Midjourney

AI Image Generator

"Imagination: now hiring"

WHAT IT DOES

A text-to-image AI that generates stunning, professional-quality visuals from text prompts in seconds.

HOW TO USE IT AT WORK

- ▶ Create presentation visuals without a graphic designer
- ▶ Generate concept mockups and product imagery
- ▶ Design marketing and social media graphics fast
- ▶ Prototype visual ideas before investing in production

08

09

Zapier AI

AI Workflow Automation

"Automate the stuff you hate doing"

WHAT IT DOES

Connect 7,000+ apps and build AI-powered workflows using plain English — no code, no IT ticket, no waiting.

HOW TO USE IT AT WORK

- ▶ Build multi-step automations by describing them in plain English
- ▶ Use AI to classify, route, and respond to emails automatically
- ▶ Sync data between tools without manual copy-paste
- ▶ Trigger AI actions based on forms, CRM updates, and more

09

10

Gamma

AI Presentation Builder

"Decks without the dread"

WHAT IT DOES

An AI tool that generates polished, designed presentations, documents, and webpages from a single text prompt.

HOW TO USE IT AT WORK

- ▶ Generate a full presentation deck from a topic in 30 seconds
- ▶ Remix and redesign slides with simple prompts
- ▶ Export to PowerPoint or share as a live URL
- ▶ Skip the blank-slide-staring phase entirely

10

THE BOTTOM LINE

AI won't take your job. But someone using AI might.

 Start with ONE tool — overwhelm is the enemy of adoption.

 Use it daily for two weeks before judging it. It gets better as you learn it.

 Apply it to your biggest pain points first — not the fun stuff.

 Share what works with your team. A rising tide lifts all boats.

Now stop reading slides and go actually try one.

MAA Specifications Committee

- ▶ Chair - Cyndy Brock - Stoneco

- ▶ Vice Chair - Casey Smith - Edw. C. Levy

The background of the slide is a photograph of a large quarry or aggregate processing site at sunset. The sky is a mix of orange, yellow, and dark blue, with some clouds. The quarry itself is a deep, terraced excavation with visible rock faces and some equipment in the distance. A line of trees is visible on the horizon. In the upper left, there is a small orange horizontal bar.

SPECIFICATIONS COMMITTEE UPDATE · JUNE 24, 2026

Halliday Sand & Gravel

Verdantas

MAA

MDOT UPDATE

Leadership, budgets and the supplier list

Leadership transitions

Scott Thayer (North Region) retired June 18; Bob Ranck (Bay Region) retires in November. MDOT is recruiting for both roles.

FY27 budget in play

One proposal adds ~\$50M for MDOT but eliminates Economic Development funding and trims the multimodal program.

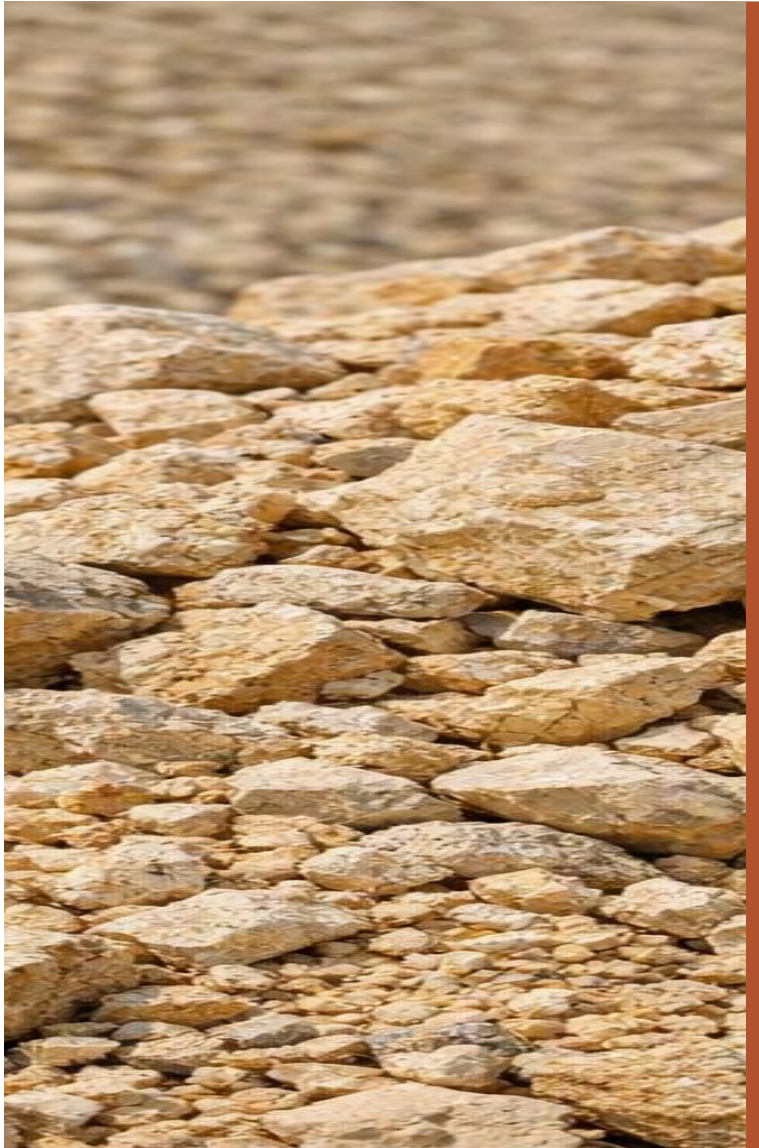

Winter maintenance overrun

FY26 winter costs ran ~\$49M over budget, squeezing summer work contracted to local road commissions.

Prequalified CPM suppliers

MDOT is working to publish prequalified CPM aggregate suppliers; crushed concrete is listed today; blended products are not.

MAA UPDATE

Supply pressure and telling our story

Stoneco supply allocation

With Burmeister Pit reserves depleted and Manchester Pit permitting delayed, Stoneco began allocating sales at its Moscow Pit on May 1, 2026 — customers were notified March 27.

“Neighbors in Nature” documentary

MAA is producing a film that follows an aggregate operation from outside the berms through mining to reclamation.

TESTING & SPECIFICATION PROGRESS

Moving the technical work forward

Freeze / thaw testing

DRAFT REPORT: END OF JULY

Bowser-Morner delivered final results to MDOT on May 13. MDOT's concrete lab is drafting a report for leadership review.

Optimized aggregate

M-14 TEST SECTION WITH AJAX

MDOT is studying intermediate-aggregate levels on the tarantula curve, weighing fines against shrinkage, warpage and ride quality.

Blend flexibility

P-1 MOD DESIGNS

As reserves trend finer, MAA seeks flexibility on the 2NS fine-aggregate gradation, using ASTM C-33 sand with FM and physical requirements.

TYPE 1L CEMENT

A field problem to watch

Premature spalling

Driveways and flatwork are spalling over winter since the switch to Type 1L cement.

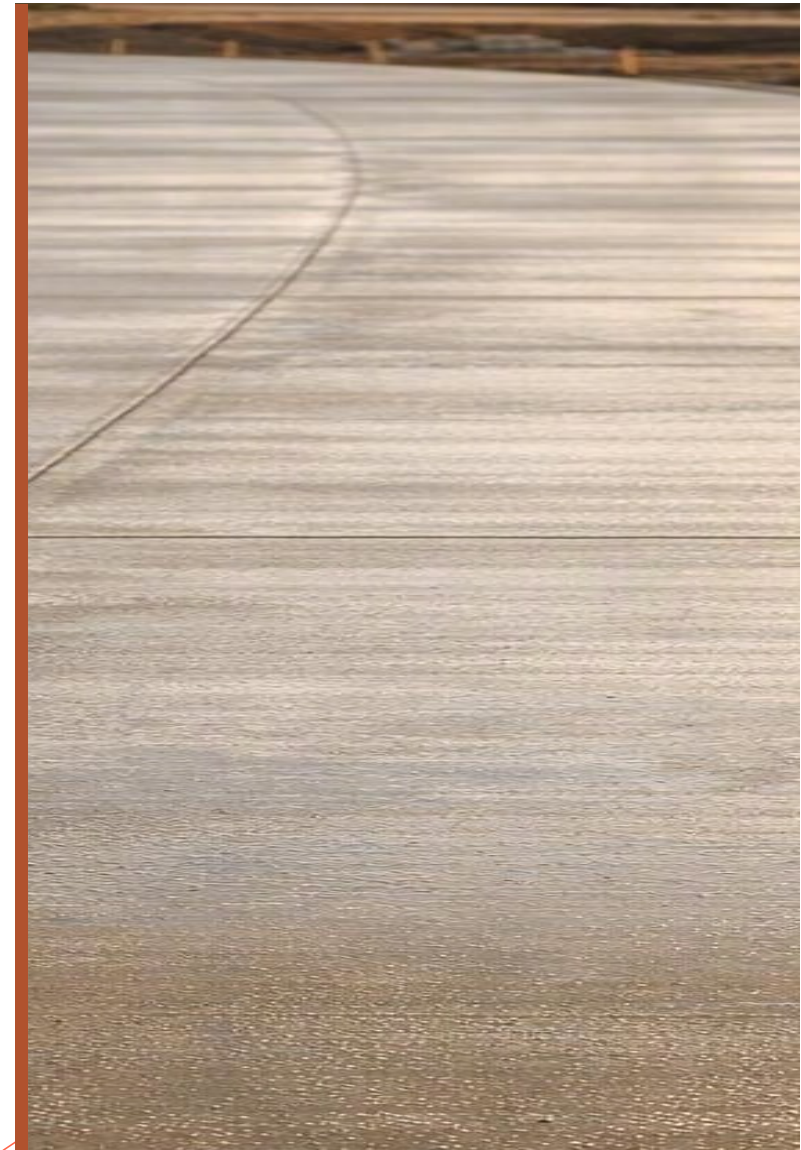

Curing is the culprit

Type 1L must be handled and cured differently than Type 1 — too-wet mixes and improper curing are driving failures.

Fines vary by batch

Limestone fines range from ~8% to over 10% from the same producer. A colloidal curing admixture showed no benefit in MDOT testing.

PERCENT-WITHIN-LIMITS QA

A new pay-factor model for aggregate

MDOT has secured funding to research Percent-Within-Limits (PWL) pay factors for aggregate — defining bonus, penalty and remove-and-replace zones. Each control sieve would get its own formula with a weighted average, applied to larger uses needing 8-10+ tests.

The concept mirrors MDOT's PWL for 3500 concrete (~3% average bonus, 5% cap) and Indiana DOT's target-mean approach. **Research is expected to begin in 2027-2028.**

PREQUALIFICATION & FIELD ITEMS

Day-to-day quality on the ground

Delivery ticket origins

Every ticket must show material origin (location number) and dock/yard — origin verifies physical properties, dock/yard verifies gradation. New AASHTOWare features are coming; MAA will send a bulletin.

Prequalification program

MDOT is refining its Prequalified Aggregate Supplier Program; Procedures for Aggregate Inspection and AASHTO R-18 still apply. MAA proposed one QC test per 5,000 tons.

Special rip rap absorption

Some pits are struggling to meet the 2.5% absorption limit on Special Rip Rap. MAA is assessing the statewide impact.

Redi-mix stockpile testing

MDOT testing at redi-mix plants is returning failures tied to how aggregate stockpiles are handled on site.

FUNDING & ADVOCACY

The policy backdrop for the industry

Road-funding reality

Q1 marijuana-tax revenue reached just \$38M against a \$420M annual projection. Trucking-fee proposals were cut from \$1B to \$100M and may resurface. Rising equipment costs mean fewer chip-and-seal jobs.

Low-carbon inquiry

Rep. Xiong is exploring low- and carbon-negative aggregates. MAA responded that hauling from pit to plant is the biggest impact — mining closer to market is the best mitigation.

NSSGA & EPDs

With no federal EPD funding, NSSGA continues as EPD Program Administrator, updating Product Category Rules (now version 3) every five years.

LOOKING AHEAD

What's next for the committee

Next sessions

September 2 and October 28, 2026 — 1:00–3:00 PM at the MAA Office.

MAA / MDOT bus tour

Draft stops: Aggregate Resources rail terminal, a Rieth-Riley or MPM asphalt plant with Consumers Concrete, and a possible sand & gravel pit.

2026 MAA Conference

Sessions on AI's impact on the industry, plus updates from every committee.

Michigan Aggregates Association · Okemos, MI · miagg.org

MAA Environmental Committee

- ▶ Chair - Alicia Ramsdell - Edw. C. Levy

MAA ENVIRONMENTAL COMMITTEE – JULY 2026

AI in Environmental: Practical Uses

- Summarize permit requirements
- Research regulations and interpretations
- Draft toolbox talks and training materials
- Speed up emission calculations and regulatory paperwork

Industry: MSHA is testing AI “smart helmets” and drones on site inspections.

MAA ENVIRONMENTAL COMMITTEE – JULY 2026

AI In Environmental: Guardrails

- Use only cited sources
- Expect AI to make things up — verify every fact
- Separate facts from recommendations
- Keep data confidential
- Always require human review

CAUTIONARY TALE: an AI density guess (8.5) skewed the TRI numbers. The real value (8.13) changed the totals — small errors add up.

FISHER SAND & GRAVEL

RECLAIMED MINING SITE

This site was once an active sand and gravel operation that supplied essential materials for Michigan's infrastructure and communities.

Through responsible planning and reclamation, the land has been restored for future generations demonstrating the aggregates industry's commitment to environmental stewardship and sustainable land use.

MICHIGAN AGGREGATES ASSOCIATION
RECLAMATION IN ACTION

Reclaimed by: 

LOCATION: CHIPPEWA TOWNSHIP
RECLAMATION PROJECT: BUCKS RUN GOLF CLUB & HOMESITES

For decades this former Mid-Michigan sand and gravel mine enabled the construction of countless state and local infrastructure projects that includes the rebuilding and modernization of M-20, the key link between Mt. Pleasant and Midland. Today, approximately \$8 million has been invested in creating the Bucks Run Golf Club and Homesites reclamation project where up to 35 homesites will be developed.

SUMMER CONFERENCE CHARITY

COMFORT.CARE. HOPE.

Supporting children during one of the hardest days of their lives.

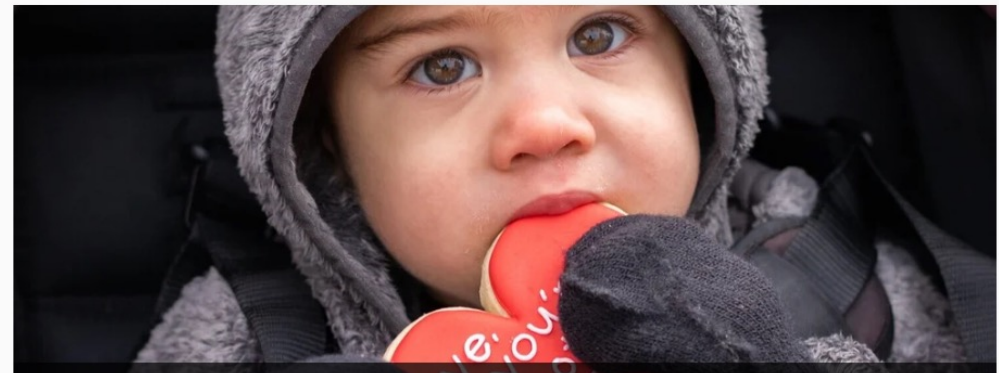

Cart (0)

Our Purpose

When children are removed from their homes out of concern for their safety, they are usually brought to a child welfare services office to await placement. This wait can be a few hours to several days. These children often have nothing with them and are scared, lonely, hungry, and in dirty clothing.

Isaiah 117 provides a comforting home where these children instead can be brought to wait – a place that is safe with friendly and loving volunteers who provide clean clothes, smiles, toys, and snuggly blankets. This space allows children to receive the comfort and care they need while child welfare staff can do the necessary paperwork and identify a good placement.

The mission of Isaiah 117 House is threefold:

ARTIFICIAL INTELLIGENCE IN PUBLIC RELATIONS

"I DON'T THINK AI WILL REPLACE
PEOPLE.
I THINK PEOPLE USING AI WILL REPLACE
PEOPLE WHO DON'T."

THE BETTER THE PROMPT... THE BETTER THE RESULT

The quality of the answer depends on the quality of the information you provide.

 Less Effective

Write me a Facebook post about dust control.

 More Effective

Write me a Facebook post. The audience is local residents. The purpose is to build trust. The tone should be friendly. It must be under 150 words. The topic is dust control. It should be positive towards mining.

2026 MAA Summer Conference
Safety Committee

MSHA Updates and Technology Trends in the Safety Industry

MSHA Updates

- Wayne Palmer is the new assistant secretary with experience on the M/NM side of the mining industry
- Silica Rule Status – New proposal expected later this year
- FMSHRC – S&S Test – Challenged by the industry in federal court
- Considering changing informal conference procedure

New Technologies in MSHA enforcement efforts

- AI platform designed to predict mine safety hazards that will direct inspectors' enforcement focus
- AI data will be integrated into inspector "smart helmets"
- Utilize drone and 3D imaging technology as an enforcement tool

Safety Committee Focuses

2026 Annual Winter Meeting

- MSHA Updates
- Technology Trends in the safety Industry
 - B2W Technology
 - ChatGPT / Gemini / Notebook LM
 - Motive Camera System

Developing a MSHA compliant requirement checklist

Developing a library of Safety Resources

- Required Safety Programs
- JSA's
- Toolbox Talks

Educational Site Visit – September 23rd @ Stoneco Rail Yard
